we take great pleasure in presenting this work to the trade confident that it will meet a long felt need although it addresses garments somewhat beyond the usual scope of tailoring practice they nevertheless form a legitimate and indeed essential part of it there is no more reason to decline orders for such garments simply because certain firms have chosen to specialize in them than there would be in refusing to make a pair of breeches or any other item that naturally belongs within the tailor s craft it is the duty of every progressive house to embrace those branches which though sometimes neglected are vital to the completeness of a craftsman s repertoire as regards the work itself the systems instructions and details of execution we submit with confidence that they will be found both reliable and of genuine practical service they are not the product of theory or speculation but rather of one who has gained wide and varied experience in this particular branch of the trade and is therefore well qualified to speak with authority both the diagrams and the accompanying text have been prepared with the greatest care uniting clarity with refinement every line has been drawn with precision and every explanation phrased with utmost attention so that the student may proceed with confidence and the experienced practitioner may find their skill further enriched no effort has been spared to make this work worthy of its title a genuine guide to shirt cutting not merely a compilation of rules but a practical manual filled with hints and suggestions of lasting value to both learner and expert

time tries all things and no better test can be desired than the fact that after years of widespread recognition as a standard work on cutting and practical tailoring this book has so grown in favour that edition after edition is demanded this the tenth part deals with all kinds of waistcoats and similar garments and though it comes late in the series it is not by any means the least important class of garments the tailor is called upon to produce no pains have been spared either by author artist or printer to make this part a worthy companion of the preceding ones in conclusion we can justly make a further quotation from the preface of part one which will be found to apply with equal force both to the individual part now before us and to the cutter s practical guide volumes as a whole very rarely if ever has a work so comprehensive been published in connection with the art of cutting as this great work by mr w d f vincent
